1

The reimbursement rate for each locality has been determined by (1) subtracting the statewide minimum index score (i.e., the Goochland County value) from the index score of the target jurisdiction, (2) subtracting the lowest index score in Virginia from the highest index value for the Commonwealth (i.e., the Emporia City statistic), (3) dividing the Step 1 difference by the Step 2 variance, (4) multiplying the quotient obtained in Step 3 by 70, and (5) adding 30 to the arithmetic product calculated in Step 4. [This computational framework has been implemented under the authority of Robyn M. de Socio, Executive Secretary, State Compensation Board.]
